

Project Design Phase-II Data Flow Diagram & User Stories

Date	31 January 2026
Team ID	LTVIP2026TMIDS62122
Project Name	Startup Success Prediction System Using Machine Learning
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

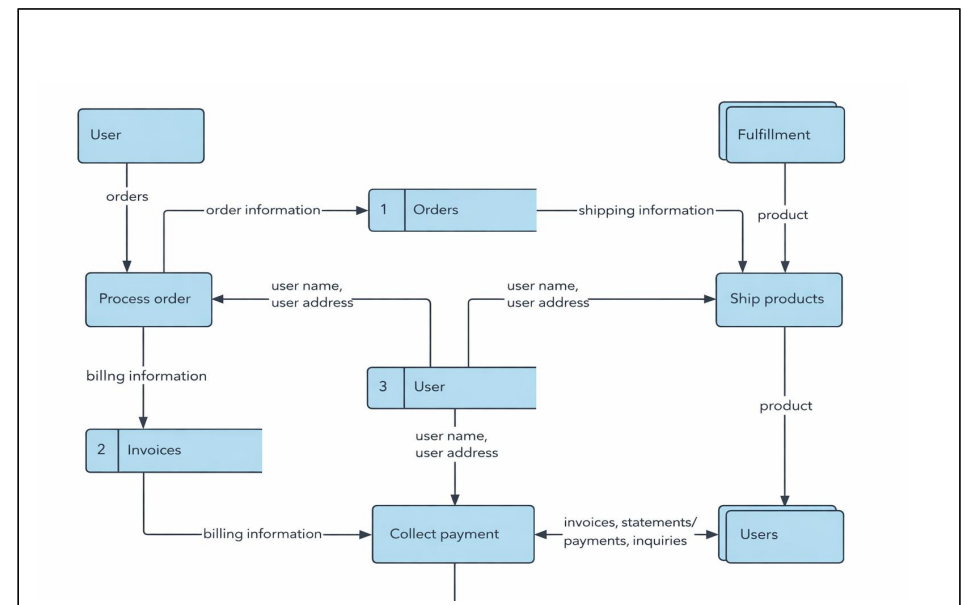

Example: [\(Simplified\)](#)

1. User configures credentials for the Watson Natural Language Understanding service and starts the app.
2. User selects data file to process and load.
3. Apache Tika extracts text from the data file.
4. Extracted text is passed to Watson NLU for enrichment.
5. Enriched data is visualized in the UI using the D3.js library.

User Stories

Example: DFD Level 0 (Industry Standard)

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story No.	User Story / Task	Acceptance Criteria	Priority	Release
Customer (Mobile User)	Registration	USN-1	As a user, I can register by entering my email, password, and confirming my password.	User is redirected to dashboard after successful registration.	High	Sprint-1
		USN-2	As a user, I will receive a confirmation email after registration.	User receives email and can verify account by clicking confirmation link.	High	Sprint-1
		USN-3	As a user, I can register through Facebook.	User can login and access dashboard via Facebook authentication.	Low	Sprint-2
		USN-4	As a user, I can register through Gmail.	User can login and access dashboard via Gmail authentication.	Medium	Sprint-1
	Login	USN-5	As a user, I can log into the application using email and password.	User successfully logs in and accesses dashboard.	High	Sprint-1
	Dashboard	USN-6	As a user, I can view my personalized dashboard after login.	Dashboard displays user details and relevant features correctly.	High	Sprint-1

User Type	Functional Requirement (Epic)	User Story No.	User Story / Task	Acceptance Criteria	Priority	Release
Customer (Web User)	Registration & Login	USN-7	As a web user, I can register and login through the website.	User can access web dashboard after authentication.	High	Sprint-1
Customer Care Executive	Support Management	USN-8	As a customer care executive, I can view and respond to customer queries.	Executive can update query status and respond to users.	Medium	Sprint-2
Administrator	User & System Management	USN-9	As an admin, I can manage users and monitor system activities.	Admin can view, update, or deactivate users and generate reports.	High	Sprint-2
User Type	Functional Requirement (Epic)	User Story No.	User Story / Task	Acceptance Criteria	Priority	Release
Customer (Mobile User)	Registration	USN-1	As a user, I can register by entering my email, password, and confirming my password.	User is redirected to dashboard after successful registration.	High	Sprint-1
		USN-2	As a user, I will receive a confirmation email after registration.	User receives email and can verify account by clicking confirmation link.	High	Sprint-1
