

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	19 February 2026
Team ID	LTVIP2026TMIDS62122
Project Name	Startup Success Prediction System Using Machine Learning
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	• Registration through Form • Registration through Gmail • Registration through LinkedIn
FR-2	User Confirmation	• Confirmation via Email • Confirmation via OTP
FR-3	User Login & Authentication	• Login using Email & Password • Login using Gmail • Forgot Password / Reset Password • Session Management & Logout
FR-4	User Profile Management	• View Profile • Edit Profile Details • Change Password • Upload / Update Profile Picture
FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	• Registration through Form • Registration through Gmail • Registration through LinkedIn

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The system shall provide a user-friendly interface that is easy to navigate for both mobile and web users. The application should have clear instructions, responsive design, and minimal learning curve.

NFR-2	Security	The system shall ensure secure authentication and authorization. User data must be encrypted, passwords stored using hashing techniques, and secure communication maintained via HTTPS.
NFR-3	Reliability	The system shall operate consistently without failures. It must handle errors gracefully and ensure data integrity during transactions and operations.
NFR-4	Performance	The application shall load pages within 2–3 seconds under normal network conditions and support concurrent users without significant performance degradation.
NFR-5	Availability	The system shall be available 24/7 with minimal downtime, ensuring continuous access for users except during scheduled maintenance.
NFR-6	Scalability	The system shall be capable of handling increased user traffic and data growth by supporting horizontal and vertical scaling mechanisms.
