Project Name	Startup Success Prediction System Using Machine Learning
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Startup Success Prediction Project

Team ID: LTVIP0266TMIDS2222

- ⌚ 10 minutes to prepare
- 🕒 1 hour to collaborate
- 👥 2-4 people recommended

1

Before you collaborate

A structured brainstorming session was conducted to identify a suitable real-world problem that can be solved using Machine Learning techniques. Focus was on problems with high practical relevance, data availability, and deployment scope.

⌚ 10 minutes

- ☒ **Team gathering**
Discussed various real-world domains such as healthcare, finance, and business analytics.
Reviewed relevant datasets and feasibility of implementation before finalizing the topic.
- ☒ **Set the goal**
 - Has real-world impact
 - Can be solved using classification algorithms
 - Allows full ML lifecycle implementation
 - Can be deployed as a web application
- ☒ **Tools used**
 - Online collaboration discussion
 - Dataset availability analysis
 - Feasibility comparison matrix

2

Define your problem statement

PROBLEM

How might we predict the success probability of a startup using historical funding data and machine learning techniques?

This problem focuses on helping investors and entrepreneurs make informed decisions using predictive analytics.

- ☒ **Key rules of brainstorming followed**
 - Stayed focused on real-world business problems
 - Encouraged innovative and data-driven ideas
 - Avoided early judgment of ideas
 - Generated multiple solutions before prioritization
 - Evaluated ideas based on feasibility and impact

Final selected idea

Startup Success Prediction using Machine Learning

- High business relevance
- Availability of startup funding dataset
- Suitable for classification modeling
- Supports real-time web deployment using Streamlit
- Demonstrates complete ML workflow

Step-2: Brainstorm, Idea Listing and Grouping

1

Brainstorm

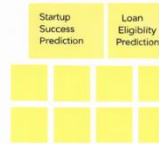

Write down any ideas that come to mind that address your problem of predicting startup success.

⌚ 40 minutes

Tip

Use individual sticky notes for each idea. Quantity matters over quality.

2

Group Ideas

Take turns sharing your ideas while clustering similar or related notes into groups. In the last 10 minutes, give each cluster a descriptive label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

⌚ 30 minutes

Amar

Tip

Add descriptive labels to sticky clusters to organize them; their better and patterns emerge.
