Project Name	Startup Success Prediction System Using Machine Learning
Maximum Marks	2 Marks

Customer Problem Statement Template:

Entrepreneurs and investors struggle to make informed decisions about startup success due to the lack of accessible, data-driven prediction tools. The complexity of analyzing funding patterns, industry trends, and performance metrics creates uncertainty and increases financial risk. There is a need for an intelligent system that predicts startup success probability and provides clear analytical insights to support better decision-making.

I am	Describe customer with 3-4 key characteristics - <i>who are they?</i>	Describe the customer and their attributes here
I'm trying to	List their outcome or "job" the care about - what are they trying to achieve?	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – <i>what bothers them most?</i>	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – <i>what needs to be solved?</i>	Describe the problems or barriers that get in the way here
which makes me feel	Enter the "root cause" of why the problem or barrier exists – <i>what needs to be solved?</i>	Describe the reason the problems or barriers exist
	Describe the emotions from the customer's point of view – how does it impact them emotionally?	Describe the emotions the result from experiencing the problems or barriers

Example:

I am a traveler	I'm trying to book flights on my phone	But it takes a long time	Because The website is not responsive and doesn't have a mobile version	Which makes me feel Frustrated
--------------------	---	-----------------------------	--	-----------------------------------

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A startup founder	Predict whether my startup will succeed	I don't know which factors influence success	There is no simple AI-based prediction tool available	Confused and uncertain
PS-2	An investor	Identify high-potential startups before investing	It is difficult to manually analyze large amounts of startup data	Data is scattered and requires technical knowledge to interpret	Overwhelmed and doubtful
